

# Warehouse Automation Analytics

Performance metrics and automation optimization insights

Generated by: Vanguard Warehouse Controller  
Date: 8/3/2025, 8:01:57 AM  
Use Case: warehouse-automation

## Automation Overview

Total Warehouses: 5  
Total Robots: 44  
Average Utilization: 75.6%  
Throughput Increase: 34.2%  
Labor Cost Reduction: 28.5%  
ROI Period: 2.3 years

## Warehouse Performance

Warehouse Location		Capacity Used	Inbound/Day	Outbound/Day	Picking Accuracy	Automation Level	Status
Distribution Center A	Chicago, IL	46.8%	1,140	2,328	99.4%	63.6%	Improvement Needed
Distribution Center B	Dallas, TX	76.9%	1,574	2,531	97.1%	81.8%	Optimized
Distribution Center C	Atlanta, GA	85.9%	2,821	1,790	96.9%	75.6%	Improvement Needed
Distribution Center D	Los Angeles, CA	51.5%	1,983	2,145	96.1%	81.4%	Optimized
Distribution Center E	Newark, NJ	75.7%	2,673	3,539	98.0%	75.8%	Improvement Needed

## Optimization Opportunities

- Deploy 5 additional AGVs in Warehouse 3 to increase throughput by 20%
- Imple

ment voice-  
picking  
system to  
improve  
accuracy to  
99.8%

- Upgra  
de WMS  
integration  
for real-time  
inventory  
visibility

- Add au  
tomated  
sortation  
system for  
small  
package  
handling

- Imple  
ment  
predictive  
analytics for  
demand-  
based  
staffing

- Consid  
er AS/RS  
system for  
high-  
velocity  
SKUs
